**Comments / Feedback**

Good CSA session.  
 Sue Amos very good, questions useful.  
 Heart failure nurse – good overview of services.  
 Good talk. Useful to discuss CSA.  
 Good to have chat re heart failure and know what services are available. Good talk by chest pain nurse, although more appropriate to hospital practice. Always good ST3 talks – very useful.  
 Good presentation. Well organized.  
 Very good. Clear. Useful topic covered and good guest speaker.  
 Very useful session, good overview of cardiac services in the area.  
 Very useful talk from Sue Amos, Cardiology Specialist Nurse.  
 Good. Nice to hear from nurses, especially committee.  
 Good informative discussions from guests.  
 Covered points we wouldn't read up on normally i.e., not diagnosis, prescription and management.  
 Room for questions – helpful quiz.  
 Heart failure nurse, good overview of services. Good quiz, good way of consolidating knowledge. Good time keeping we didn't run over.
