

# Worcester VTS - Evaluation Form

ST1 ST2  
ST3  
(please circle)

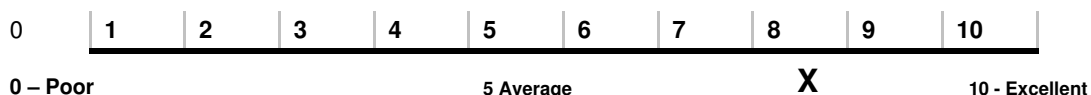

4 February 2010

## Aims: / Objectives:

Infectious Diseases / Public Health

## Comments / Feedback

Good talk on travel medicine, very detailed handout.  
 Good advice re vaccines/malaria prophylaxis. CSA scenarios might have been useful.  
 Very useful information.  
 Quiz was a bit too long. Tried to fit too much in. Good effort put in.  
 Good core topic to approach. Some focus on rarer illnesses was interesting (but not particularly applicable to GP, namely leprosy).  
 Good interactive component.  
 Slightly information heavy, particularly towards the end.  
 Useful information. Well presented in a variety of ways. Good quiz. Related well to GP land.  
 Useful, interactive, good general knowledge, related to GP.  
 Interesting. A little long – the quiz.  
 Interesting.  
 Great session. Varied. Too many words.  
 Interesting stuff. Thanks.  
 Good malaria talk. Interesting topic with great presentation.  
 Good.  
 Very good. Like questions.  
 Very useful and practical information about issues related to GP, regarding travel medicine and infectious diseases.  
 Very good, informative.  
 Well organized and prepared. Quiz was a bit too long.  
 Well presented. Interactive. Difficult topic to cover – huge topic!!  
 Very useful having the pharmacist to explain private vaccines. Good to learn with a quiz.  
 Informative update on current travel guidance. Good pharmacy information. Interesting quiz.  
 Good advice about – vaccines, malaria. Good informative about hepatitis, travelling, flights, diarrhoea.  
 Very useful topic as we see lots of people in GP asking for travel advice.  
 Very wordy quiz in places much less written and much more quiz. More on world infectious diseases would be good.
