

15 January 2009

EVALUATION SUMMARY:

Genetics in Primary Care

Please comment on what you found most useful, helpful or interesting.

Risk of common cancers was useful to go through. Good to revise drawing family trees and referral process.

Workshops.

Website.

Great expert talk.

Discuss about significant family history.

Very useful, the information on website was helpful.

Interesting. Workshops very useful.

Genetics in GP.

Good scenarios.

Information on family trees.

Very useful. Interesting.

Very useful. Basics re-inforced. Good having an outside speaker.

Teaching.

Basics on family tree.

Carcinoma risk.

Cancer genetics.

Pedigree

Please comment on what could be improved.

To cover antenatal advice.

Nothing.

Nil.

Less basic science – more case discussion.

Quite dry.

How do you intend to make use of the new skills and/or knowledge?

Good to know referral process and who is to refer. Will look on genetics website for revision for AICT.

Reference. Ask more detailed family history.

Further reading.

Think about/enquire about family history more thoroughly. Discuss with practice about family history information held on computer.

Look at suggested websites.

Use it when dealing with patients.

It was a good session.

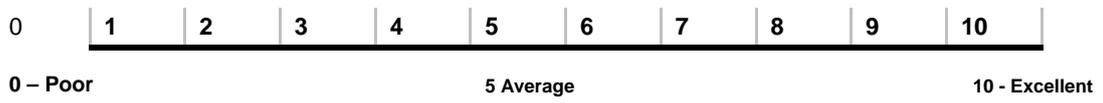

Pass the AKT – hope there is a genetics question!!

Refer and investigate appropriately.

Aim more revision re cancer genetics

Any other comments?

Good day with clear teaching.
