(please circle)

9th October 2008

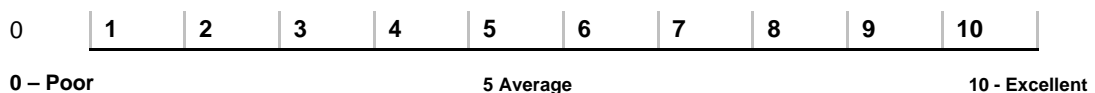

## Aims: / Objectives:

**Asthma Diagnosis and management  
BTS Guideline  
COPD Diagnosis and management  
Home Oxygen**

**Registrar      Journal Update and eportfolio  
ST2              Decision Making**

## Comments / Feedback

Good 2 topics to choose to talk about. Nicely presented with use of props + videos – range of teaching materials. Easy to follow with important points highlighted.  
Very good. Relevant. Guidelines involved. Good explanations. Good handouts.  
Informative and well presented respiratory presentation. Interesting and helpful Paeds workshop. Thank you.  
Difficult for ST1 and ST2 to make if all clinically relevant to GP, but possibly consider case scenarios.  
Useful presentation on Asthma and COPD. Good discussion on journal articles and case discussion.  
Respiratory – Excellent talks, best we have had both very clear and good concise slides, both presenters knew their subject, also good discussion. Journal discussion very informative.  
Good revision of COPD. Good discussion in small groups.  
Asthma, BTS, COPD – very good, clear review of nice guidelines.  
Good Stuff.  
Very useful presentation.  
Good information. Good inhaler techniques.  
Highly appropriate.  
Very informative.
