

## **GP VTS 14/5/09 Evaluation (breakdown of responses)**

24 attended (plus 2 course organisers)

18 completed evaluation forms were returned

### **Clarity of presentation:**

Excellent

Very good

Very clear, well presented

Good presentation, knowledgeable

Very good

Good clear slides

Well structured. Good use of slides

Excellent

Excellent presentation - just the correct length, useful information

Clear and concise

Very good. Nice short presentations.

Very good and relevant. Clear.

Very good - allowed for questions to be answered throughout which made it nice and interactive.

Clear. Useful discussion points.

Excellent

Good presentation.

### **Usefulness of information received:**

Very useful and up-to-date

Very useful and helpful

Very useful

Helpful and supportive information

Really helpful - more group work might be useful

Diabetes especially good

Good, especially how to access the service from primary care. Very useful question and answers session.

Very useful. Thank you for focusing it on primary care and addressing some of practice politics

Good amount of information. Very useful to have a tour of the building in order to inform my patients of what it is like

Useful session on diabetes

Very useful. Good to see what services are offered from hospice

Very useful. Appropriate

Actually a lot more useful than I had anticipated. I simply hadn't realized how much GP's are involved in the care of palliative patients and have learnt a great deal and appreciated a great deal just from this very quick afternoon visit

Very useful. Will be helpful in everyday practice. Good to be able to have a tour around the hospice. Very useful to look at diabetes in palliative care.

Very relevant to GP

Case study was excellent; gave a good overview of care from diagnosis to death.

Very useful. Has highlighted many gaps in my knowledge and learning. Has made me appreciate the importance of palliative care

## GP VTS 14/5/09 Evaluation (breakdown of responses)

### Comments:

Excellent

Would like to come again and learn more

Thank you for an interesting afternoon

Thank you

Very useful

Tour was too much, 5 mins in clinical areas would be enough. Maybe talking about specific case examples could be used to highlight learning points

Very friendly presentation, made to feel welcome in the hospice

Thank you

Relaxed, systematic and useful. Knowing how to access service and physically seeing what the hospice offers is very useful.

Very good idea to teach using a simulated patient example. I would have liked to discussed euthanasia in palliative care, but this was obviously a huge topic to only brush the surface of and would've had to have been a non-interactive section.

Thank you

? More case studies instead of walk around building

Will become part of my PDP
