26 May 2011

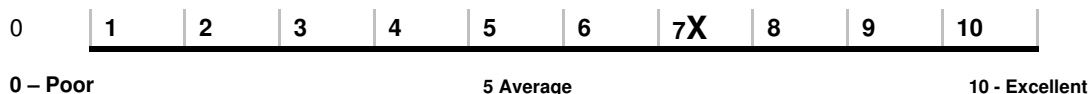

## Aims

Significant Event Analysis

Increase understanding of significant review cases  
How to carry out a significant event analysis

## Comments / Feedback

Good group work for discussion.  
 Fantastic.  
 Attempted to cover dry topic and involve audience. Relevant to practice.  
 Good topic coverage. Discussion of individual experiences of SEA would have been relevant. Nice group work.  
 Dry subject area – discussion groups were a good idea, but it would have been better with less interruptions and actual discussion into groups with more time.  
 Thanks. A good look at events.  
 Difficult subject to teach. Some examples were a bit complex.  
 Good presentation and discussion later.  
 Useful session.  
 Good interactive. Dermatology session very good.  
 Excellent session on dermatological Prior session on significant events provided a great deal of discussion.  
 Well structured, good cases. Very useful dermatological quiz.  
 Difficult subject to teach. Did not realize some things that would be included as a SEA.  
 Very useful Balint group discussion.  
 Good review – Need to organize cases more.  
 Good overview.  
 Slightly dull presentation – maybe could have been a bit more organized. Good Balint group – nice to discuss cases.  
 Interesting and thought provoking the case discussions were really useful. Thank you.
