

# Worcester VTS - Evaluation Form

ST1 ST2  
ST3  
(please circle)

10 September 2009

## Aims: / Objectives:

Consultations Modules

## Comments / Feedback

Very insightful in methods of consultation.

Good way of presenting with a fairly dry topic.

For ST1 doctors, good introduction to this.

Useful, brilliant presentation. Nice topics. Constructive.

Very informative way of illustrating models of consultation. Excellent.

Very useful and fun way to learn. Illustrated each model very well with role-play and had good trainee participation. Interesting perspectives to a rather large topic.

Nice interactive session. Good audience participation. Fun ice breaker at beginning.

Doing the different doctor/patient scenarios was good. Small groups helped make sense of the different models.

I did not clearly pick up which modules I should adopt, or whether the point was to say, we use a little bit from each, according to the situations.

The acting scenarios were good, helped to illustrate each model. Understood each model, helped me reflect on all of them.

I think we could have touched more on how or what was the ideal model, from a CSA/AKT point of view. Is it the RCGP model? I am confused, or maybe that's just me.

Good learning explanation about different consultation models. Different types of patients.

Good learning about DVLA and alcoholism.

Quite long. Very good c/v consultation models.

Good review. Well presented.

Dry subject made interesting. Initial acting helped get people relaxed. Worked well as first session of term.

Fun, interesting.

Good general overview.

Useful revision to models. More detail on use of models from authors would be good.

Interesting to see different aspects of peoples consulting styles.

Good, fun demonstrations.

Difficult to understand what I am suppose to know or is this simply a session to aid my own consultations.

Consultation models - excellent, please repeat later in the year.

Good overview of consultation models, useful exercise to start.

Fun way to present different modules. Very interactive and unmovable. Nice planning session. Group work great.

Good to revise consultation models. Interactive. Good to plan for the small groups for the year.

Useful role play and fun. Not so good going through ten all consecutively

Really useful. Is a bit clearer now.

Good session well demonstrated.

Good overview to aid revision.
