**SHOs:** Mistakes and Errors in Practice  
**Group:** Examination of the Knee and Shoulder

### Comments / Feedback

Complimentary therapies – good and useful  
Very good and useful session  
Excellent – more stuff like this needed  
Very useful examination sessions, perhaps a little bit more time of each would have been better  
Excellent teaching from the physios – thank you to the “model” volunteers  
Very interesting to know how people do different mistakes, even though they are very thorough, good learning points.  
Completely alien to shoulder and knee examination before, but this is a good start, need to do more practice.  
Useful session on orthopaedic examinations  
Hips and backs session?  
Longer session focusing on one examination only – Adding on common diagnoses and findings that you see at GPs and how to treat them  
The knee and shoulder was really well done  
Good to have a go at examining shoulders  
Would have been better if there was more time to examine knees too  
Rushed examinations, otherwise very good  
Good but needed longer to consolidate practice  
Useful to revise joint examinations  
Physios – examinations were a little too detailed, could of done with more time practicing  
Very interesting – would welcome another session  
A further session if ever possible would be very useful  
Very interesting and useful.

### Comments / Feedback

Over all very good  
The GPR video – excellent  
Exam question – excellent  
Very good  
Well presented  
Enjoyed case discussion  
A bit repetitive  
Elderly care – to many slides although well prepared  
Second half – more interactive and more helpful, maintained interest  
Very helpful review and an excellent presentation, handout with key points would of helped  
Elderly care – very interesting/ relevant  
Good use of group/ interactive learning  
Very well put together presentation  
Nice case histories to focus discussions  
Lots of useful contacts for support  
Excellent presentation and very useful  
Gives us insight of how to answer exam papers – should do more  
Good group work  
Very good presentation  
Greatly useful – thank you  
Very well organised and relevant group session  
Excellent preparation and debate  
Group presentation – very interactive  
Debate very good  
Very interesting and useful day  
Useful to cover ethical issues  
Good polypharmacy presentation  
Polypharmacy good but quick  
Session was great on ethical issues  
Very useful video  
Presentations were too long  
In elderly care and polypharmacy session's dementia was dealt very well but polypharmacy session was very superficial and could have been done better.  
Career ideas – very interesting session and informative  
Elderly care – well structured and interactive  
Career – useful information had never thought there was much to know  
Good discussion of career option and interactive discussions  
Was good to exchange tips and practical points  
Good overview.

Some sessions were too long  
2<sup>nd</sup> session was extremely useful  
Great presentations – lots of topics  
Useful to let everyone else know  
Group – very informative  
SHO's – more sessions on guidelines please!  
Useful to talk through guidelines  
Useful discussions on BP qualities.  
Good paediatrics for minor ailments – excellent  
Hypertension – really helpful

**Group:** Heart Failure  
**Registrars:** Asthma, Videos and problem cases  
**SHO Inn:** QOF/PBC Session 1  
**SHOs:**

### Comments / Feedback

All good  
Very good, useful to hear. Guidelines for heart failure  
Heart failure presentation – very relevant, clear, what we needed to know  
Excellent talk on heart failure, very informative  
Good to critique videos as usual, GPR group good  
Good session – heart failure, very useful on prescribing advice  
Heart failure nurses – who to contact.  
Really excellent large group session, sorry I was late!  
Useful but depressing going through video, as ever  
Having an expert speaker for heart disease makes the session so much more useful  
Very practical session, very useful for daily work.  
Well presented  
Heart failure was quite useful, a little bit elaborate  
QOF / PBC self learning session very useful  
Great heart failure presentation  
QOF researched  
Good knowledge of local service  
Excellent presentation re heart failure with up-to-date info  
Very useful to have a HP with special interest to ask questions  
Heart failure session was very good  
QOF / PBC very informative learnt a lot about QOF

### **Comments / Feedback**

Good presentation especially the thyroid presentation  
Very good  
Very useful videos  
Great presentation – D.M in children  
Some useful bits, two videos is too much (exhausting)  
Would like to do some CDM  
Very informative QOF / PBC learning more and more  
Good variety of presentations  
Summary of QOF and FBC useful  
Lots of information on endocrine could be split into two sessions, useful QOF and PBC.  
Learnt a lot.  
Good outline of QOF / PBC  
Diabetes in children particularly good. Thank you  
Very useful feedback re videos  
Good endocrine stuff – pituitary stuff a bit rushed.  
Second session perhaps just 1 video/week and one written question

### Comments / Feedback

Very interesting session

Useful to hear from a patient's point of view and what is important to them

Good to know services available

Overall very good

Good presentation

Excellent session, well resourced

Good hosting from Mary

Very helpful to hear from expert Patient

Enjoyable informative session

Good main group session

Practical

Interesting

MS patient very good, and good intro

Presentation needed to slow down a bit

Good to meet MS nurses

Very good multi-disciplinary presentations, which must to have taken ages

Very informative

Excellent session on MS

Well organized

Good handouts especially advice to patients re driving etc.

Paed referral session good to ask common questions

Good personal input on MS

Excellent discussion on Paediatrics

Good overview and interactive

Very good presentation

Good

Useful

Innovative presentation style

Different

Excellent healthcare budgeting

Very helpful to have specialist services in to talk to us

Specific study of MS – appreciated!

Really well organized

Excellent presentation

Really useful to hear patient's perspective

MS – very good, useful

Small group – cutting budget by two million – interesting!

Excellent to have 'patient' attend session as insightful and unusual slant on standard teaching.

Good informative session.

### **Comments / Feedback**

Open and candid session

Good use of media

    Video consultation

Good communication skills

The video session was excellent!

The Sex Ed very helpful

It is hard to deal with the 'non-medical' issues

Very good presentations. Liked the videos

Role playing / communication skills useful in group session.
